Booking COVID-19 Vaccine Appointments

March 9, 2021

Please see the message below for information provided by Fraser Health regarding booking an appointment for a vaccine:

“The day we’ve all been waiting for is here! As we approach one year of our pandemic, we now have the exciting opportunity to begin community immunizations starting with our seniors first.

Booking is now open for first doses for seniors 90 and older, Indigenous individuals 65 and older and Indigenous elders. Appointments will start on March 15, 2021.

Each vaccine delivered in our community brings us one step closer to the things and people we love most. While only those eligible can receive a vaccine, we can celebrate widely as a region on this milestone and encourage those eligible to book their appointments. Help us get our seniors immunized against COVID-19!

Clinics

For a full listing of our current clinics please visit: www.fraserhealth.ca/vaccineclinic.

Everyone who wants a vaccine will receive it at the time they are eligible. The initial 22 immunization clinics will more than meet the demand for this phase and have the ability to immunize 9 thousand people per day. This is only the initial list of clinics and we will continue to review and adjust our plans as needed throughout all stages of this roll out.

Booking an appointment

We recognize that everyone is eager to support their loved ones in booking a vaccine appointment. Please help us remind your communities that eligible Fraser Health residents can book or have someone help them [book online at this link](#), in addition to the phone option. Anyone able to book online will help to decrease call volumes at our call centres.

Everyone who is eligible to book a vaccination appointment will be able to book one. Nobody will miss their chance. Please remind everyone that they should not call or book unless they are eligible.

Community

We are grateful for the partnerships that make these immunization clinics possible. We intend to acknowledge the community-wide efforts throughout this rollout and welcome any ideas you have to amplify these messages.

We also want to share any important stories within our region that help to encourage everyone to receive a vaccine when they are eligible. Please reach out to me if you have any community members in your networks that are eligible and interested.

To ensure this process is accessible this information will continue to be available at <https://www.fraserhealth.ca/vaccine> in Arabic, Simplified Chinese, Traditional Chinese, Farsi, Hindi, Korean, Punjabi, Somali, Spanish, Tigrigna, Vietnamese, and Urdu.

Help spread the word in your community”
